PROFESSIONAL EXPERIENCE

Avanade | Consulting Analyst

May 2022 – Current

Design and deliver accessible, user-centred digital experiences across government and enterprise platforms in agile, cross-functional teams.

Key Client: Defence Export Controls | UX Designer & Frontend Developer

July 2025 – November 2025

- Led the UX design and implementation of a conversational chatbot interface that simplified complex export regulations into a guided, intuitive user journey.
- Defined user flows, interaction patterns, and information hierarchy through mid-fidelity Figma prototypes.
- Applied and extended design system tokens to ensure consistency and scalability.
- Built accessible, responsive components aligned with WCAG standards and integrated with REST APIs.
- Iteratively refined the experience through stakeholder feedback in an agile delivery environment.

Key Client: Internal initiatives | UI Designer

June 2024 – September 2024

- Led capability building through the design of reusable UI patterns, templates, and component libraries to strengthen the team's delivery toolkit for future client engagements.
- Produced pre-sales prototypes and high-fidelity mock solutions used in pitches, demos, and discovery workshops to help articulate the team's design and technical capabilities.
- Contributed to practice development by documenting design approaches, accessibility considerations, and UI standards that informed internal playbooks and future project proposals.

Key Client: Australian Taxation Office | UX Developer

October 2022 – December 2023

- Translated detailed UX designs into reusable, WCAG 2.1 AA-compliant components for a public platform used by millions of Australians.
- Strengthened adoption of the design system by standardising interaction patterns and UI behaviours.
- Resolved accessibility and usability issues identified through testing and QA processes.
- Collaborated with designers, QA, and engineers to ensure design intent translated accurately into live interfaces.
- Supported content authors through improved Sitecore structures for clearer information delivery.

EDUCATION

University of Technology, Sydney

Bachelor of Information Technology

SKILLS

Technologies: Figma, Figjam, Protopie, Sketch, Canva, HTML, CSS, React, Git, Jira

Areas of Specialty: User Experience (UX) Design, User Interface (UI) Design, Interaction Design, Design Thinking, Design Systems, User Research & Usability Testing, Prototyping & Rapid Iteration, Accessibility, Front-End Development, Documentation & Delivery
